**Privacy Rating:**

Low: Highly decorative, preserved view, reduced glare by day. Diffused, minimal privacy at night. = 5-10% open solar

Med: Decorative compromised view. Screened diffused light. Reasonable privacy at night.

High: Functional, obscured view to virtual room darkening. Full privacy by night.

**Shading Value:**

Approximate percentage of the patterns ability to reduce heat gain. The higher the value, the more effective the pattern is.

Average conventional window treatment rating: 30-79%.

**Insulating R Value:** Approximate value of the patterns ability to resist heat loss. The higher the value the more insulation the pattern provides. Average conventional treatment rating: R 2.0-3.0.

**Light Control:**

The approximate percentage of a patterns ability to reduce overall ambient light in an average sized room. Light control will vary depending on mounting attributes, window orientation, interior finishes, or the materials Inherent characteristics. Comparable industry average: 88%

Note: Values are subjective to the individual and may vary according to the inherent qualities of the materials.
